Office Action Summary

The preliminary amendment of 4/13/01 has been entered. The amendment amended the specification, canceled claims 1-28, and added new claims 29-55.

Claims in the application are 29-55.

5 Restriction to one of the following inventions is required under 35 U.S.C. 121:

10 I. Claims 29-42 and 52, drawn to a process of obtaining a highly-purified alginate composition by extracting algae in a solution with a complex forming agent, filtering the solution, precipitating alginate, collected and dewatering the precipitated alginate and repeating the steps at least once, and to an alginate composition resulting from the process containing a polymer that has a molecular weight greater than 350 kD, and containing mannuronic acid and guluronic acid in a ratio of about 0.1 to about 9, classified in class 536, subclass 3.

15 II. Claims 43-51 and 53-55, drawn to an alginate composition containing a polymer having a molecular weight greater than 350 kD, and containing mannuronic acid and guluronic acid in a ratio of about 0.1 to about 9, classified in class 424, subclass 488.

The inventions are distinct, each from the other because:

20 The alginate composition of invention II can be prepared by a process different than required by invention I, and can be different from an alginate composition resulting from the process of invention I in that

the alginate composition of invention II can have a purity different from the high-purity required to result from the process of invention I. The alginate composition of invention II can result from an alginate purification process that is known as disclosed in the specification
5 (pages 2 and 3).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

10 Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance
15 with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications
20 from the examiner should be directed to David M. Naff whose telephone number is (703) 308-0520. The examiner can normally be reached on Monday-Thursday and every other Friday from about 8:30 AM to about 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, a
25 message can be left on voice mail.
